PRESENTED BY

## HISTORY

Since 1990, public policy makers from around the state have gathered to experience the most comprehensive and diverse demonstration of classroom technology in Illinois by those who use these technologies on a daily basis - students and teachers. The result is a student technology showcase that continues to impress upon the state legislators the importance of developing a plan to promote adequate, equalized and reliable funding to meet school technology needs. Illinois Computing Educators (ICE) welcomes you to this year's event - **TECH 2018**.

## PURPOSE

**TECH 2018** is a not-for-profit initiative supported by a broad range of education and business organizations. Its purpose is two-fold:

1. to raise awareness of the critical role technology plays in preparing students to succeed in today's world
2. to emphasize the importance of allocating funding for educational technology at the state level

Join students, teachers and volunteers from across the state as we gather in the Rotunda of the Illinois State Capitol to demonstrate the power of education technology resources to Legislators and other policy makers.

On May 10th, 2018, you will have the opportunity to visit with Illinois students from your district who use technology in their classrooms in a "technology fair" style event.

More information will follow, but please mark the date in your calendar and stop by to see how students and teachers are transforming education in Illinois.

The TECH 2018 Committee thanks the General Assembly and our corporate partners for their generous support of this program.
